

Feeling Flirty™ *Purple Tradescantia*

Tradescantia hybrid

FEATURES

Spiderwort is an easy plant to grow. It is a great houseplant, but it is also a great accent plant when grown outdoors. This unique version has pink and green striped foliage. It's as if someone used a paint brush to add green stripes to pink foliage. This is a trailing plant that is perfect to use in a hanging basket or even trailing from a regular planter.

PLANT NEEDS

Light Requirement: Medium - High

Medium - Medium bright indirect light in the AM or PM, typically from an east or west window.

High - Bright direct or indirect light for much of the day, typically from a south window.

Maintenance Category: Easy

Preferred Temperature: 60 - 85 °F

Water Category: Average

Humidity Preference: Medium - High

Container Soil Type: Indoor Potting Mix
Needs Good Drainage

Care Notes:

- Feeling Flirty™ is an easy plant to grow. It is a great houseplant, but can also be grown outdoors through the summer. It will thrive in bright light indoors and can be grown in sun outdoors.
- Water as needed, when the top inch or two of the soil is dry to the touch. When you do water, apply enough water to soak all of the soil.
- It will grow best in a humid environment.
- Please note that if you don't provide enough light, the plant will become more spindly and sparse and will not be as full.
